DETAILED ACTION

1. In view of the appeal brief filed on 04/30/2004, PROSECUTION IS HEREBY REOPENED. Condition must set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Onishi et al (U.S Patent No 5,434,863) in the view of Katsumata (U.S Patent No. 6,038,608).

Regarding claim 1, Onishi discloses a network switch for a packet-based data communication network, comprising:

a plurality of ports for the reception and transmission of data packets and means for establishing a first table (figure 14) for controlling the passage of data packets between the ports, the first table holding data entries each comprising:

a table (hashing table) comprises a network address and an associated pointer to an entry. See col.10 lines 40-50, col.11 lines 30-40, figure 14.

Onishi does not disclose that the pointer in the table points to data table having entries of port number and MAC address. However, Katsumata discloses a pointer pointing to a port number associated with a MAC address and then pointing the MAC address (data table), col.4 lines 5-15. Therefore, it would have been obvious to one having ordinary skill in the art to have the feature of the table having the network address and the pointer pointing to the another table having port number and MAC address so that the search for entries in the routing table more efficient.

Allowable Subject Matter

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 4-7 and 9-12 are allowed.

Conclusion

5. Applicant's amendment (10/09/2003) necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See

MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
